(19:05:23) JTpickAtime (John): you there?
(19:05:58) David Gucwa: yeah
(19:06:27) David Gucwa: what's up?
(19:06:38) JTpickAtime (John): are you using web3?
(19:06:45) David Gucwa: no
(19:07:01) JTpickAtime (John): oh, right you're gone now
(19:07:11) JTpickAtime (John): you were a few minutes ago, right?
(19:07:14) JTpickAtime (John): What do you do on it?
(19:07:20) David Gucwa: I was on pickatime
(19:07:34) David Gucwa: The CU importer script is on there
(19:07:37) JTpickAtime (John): ww3.pickatime.com = web3 = cu.pnwsoft.com = ch.pnwsoft.com = jt.pnwsoft.com
(19:07:41) David Gucwa: ok
(19:08:35) David Gucwa: i basically just make changes to the importer page
(19:08:50) JTpickAtime (John): what's the importer page?
(19:09:12) David Gucwa: it imports user profiles from thefacebook, friendster, etc into your CU account
(19:09:23) JTpickAtime (John): oh cool.
(19:09:41) JTpickAtime (John): Are you using subversion?
(19:09:45) David Gucwa: no
(19:10:09) JTpickAtime (John): is the importer a new thing that you'll be adding to the source?
(19:10:17) David Gucwa: Yeah, eventually

(18:42:42) Winston: hey i need to add something to importer
(18:42:48) David Gucwa: ok what
(18:42:53) Winston: on the import page
(18:42:56) Winston: where you have the radio buttons
(18:43:01) Winston: to select which Network's option you want to use
(18:43:08) Winston: we need to write the name of the network under said option
(18:43:46) Winston: like
Name
[__________________]
[Friendster]
[__________________]
[Facebook]
(18:43:51) Winston: know what i mean ?
(18:43:53) David Gucwa: ok
(18:43:57) David Gucwa: one thing though
(18:44:14) Winston: i'm not seeing if that info is passed back from grabConnectu.php
(18:44:24) David Gucwa: if, for example, both Facebook and Friendster have "Dave" as the name, I just merge them into one option
(18:44:34) David Gucwa: so it might not always be so clear cut
(18:45:27) Winston: ok
(18:45:32) Winston: lets just pick the first one in that case maybe
(18:45:36) Winston: can we just say one of them there
(18:45:38) David Gucwa: also, I'm not sure why that info is relevant
(18:48:53) David Gucwa: you should be able to know which info is coming from where right in the index.php
(18:49:05) Winston: they
(18:49:08) Winston: just asked for it
(18:49:09) Winston: i'm not sure
(18:49:16) Winston: ok
(18:49:23) Winston: i'll look again and try to add it
(18:49:28) Winston: didnt see if it was being passed back in the array
(18:49:31) Winston: from the grab script
(18:50:04) David Gucwa: it isn't
(18:50:25) David Gucwa: but you should know which script info is coming from where
(18:50:27) David Gucwa: and just tag it then
(18:50:45) David Gucwa: like, if you're requesting grabFacebook.php, then it's Facebook
(19:09:08) Winston: ok
(19:11:43) David Gucwa: I need write permissions for /importer/index.php
(19:25:01) Winston logged out.
(19:27:47) Winston logged in.
(19:44:20) David Gucwa: are you editing anything in the dev server
(19:45:36) Winston: dev.theyearbook.org
(19:45:40) Winston: yea
(19:46:20) David Gucwa: oh okay
(19:46:43) David Gucwa: I'm just about to write to something on dev.connectu and wanted to make sure
(19:46:57) David Gucwa: but anyway I need write permissions for it
(19:47:06) Winston: ok
(19:47:09) Winston: giving you write for everything
(19:47:10) Winston: perms
(19:47:12) David Gucwa: k
(19:47:14) Winston: i hate how it keeps resetting the perms
(19:47:18) David Gucwa: yeah it's annoying

(21:20:55) David Gucwa: sorry I just had to take care of something else
(21:21:04) TWinklevoss: ok
(21:21:05) David Gucwa: um, I'm looking into how the school list gets built
(21:21:12) David Gucwa: shouldn't take more than 15 minutes to fix this problem at least
(21:21:18) TWinklevoss: ok great
(21:28:45) David Gucwa: ok I added those high schools to the list
(21:28:53) TWinklevoss: ok great

(21:30:19) TWinklevoss: when i click the "go" button to change his school
(21:30:59) David Gucwa: yeah the site is going really slow for me too
(21:31:00) TWinklevoss: nice it worked
(21:31:34) TWinklevoss: ok so lets check out friends page
(21:31:39) TWinklevoss: http://www.theyearbook.org/account/friends.php
(21:32:06) David Gucwa: hm
(21:32:10) David Gucwa: it shows up twice
(21:32:22) TWinklevoss: right
(21:32:28) TWinklevoss: lets try to fix that
(21:32:33) David Gucwa: ok
(21:37:43) David Gucwa: fixed
(21:37:54) TWinklevoss: great
(21:38:04) TWinklevoss: now on the contact tab of the profile, the same thing happens also
(21:39:09) David Gucwa: yeah we're getting some weird subversion conflicts
(21:39:20) TWinklevoss: ok, but its fixable right?
(21:39:24) David Gucwa: yeah
(21:39:30) TWinklevoss: ok
(21:39:30) David Gucwa: who's been working on this recently?
(21:41:12) David Gucwa: fixed contact
(21:41:26) TWinklevoss: i think WW
(21:43:18) David Gucwa: well I'll have to talk to him whenever he gets back about the page
(21:43:31) TWinklevoss: ok
(21:43:37) David Gucwa: anyway it's nothing major
(21:43:41) David Gucwa: is there anything else that needs fixing?
(21:43:42) TWinklevoss: ok, confirms aren't going out
(21:43:51) TWinklevoss: can you put mail throuhg i2hub server?
(21:45:15) David Gucwa: confirms for what
(21:45:25) TWinklevoss: new users
(21:45:30) TWinklevoss: and message notificaitons, etc.
(21:45:45) TWinklevoss: i don't think they are going through to aol and hotmail
(21:45:51) David Gucwa: hm
(21:46:52) TWinklevoss: title of "friends" needs to be "My Friends" and title of contact needs to be "Contact Info"
(21:46:59) David Gucwa: do you have a hotmail account where I can send a test email

(21:47:11) David Gucwa: I just confirmed a test email on my gmail account
(21:47:22) TWinklevoss: twinklevoss1@hotmail.com
(21:47:29) TWinklevoss: twinklevoss.com@aol.com
(21:47:42) TWinklevoss: did it go to gmail with out you changing anything?
(21:48:28) David Gucwa: I just mailed myself manually from the commandline to make sure the mail server itself works
(21:48:41) TWinklevoss: ok, so the present mail server is working?
(21:48:41) David Gucwa: not sure if something's broken with the confirms script
(21:48:46) David Gucwa: yes
(21:48:53) TWinklevoss: ok ill check my hotmail and aol also
(21:48:54) David Gucwa: let me know if you get the test mail on hotmail
(21:48:54) David Gucwa: k
(21:49:22) TWinklevoss: did you send it?
(21:50:27) TWinklevoss: ok i got it on hotmail
(21:50:29) TWinklevoss: i got it
(21:50:35) TWinklevoss: @hotmail
(21:50:43) TWinklevoss: you should send a test to my aol
(21:50:47) TWinklevoss: twinklevoss@aol.com
(21:50:51) TWinklevoss: then we know its the script
(21:51:46) TWinklevoss: when viewing your own profile your name shouild always be at the top regardless of what profile tab you are looking at...my bad
(21:52:23) David Gucwa: ok
(21:52:50) TWinklevoss: whether you're looking at your own profile or someone elses, it should always be just your name or the other person's name
(21:56:47) David Gucwa: ok that's all set
(21:56:59) David Gucwa: did you get the aol test mail
(21:57:04) TWinklevoss: im checking
(21:57:52) TWinklevoss: not yet

(22:10:18) TWinklevoss: hey i still haven't gotten my aol email
(22:10:22) David Gucwa: hmm
(22:10:38) David Gucwa: do you think aol blocked us?
(22:10:48) TWinklevoss: i don't know
(22:10:55) David Gucwa: we've gotten complaints from people about spamming them
(22:10:57) TWinklevoss: winston said it have something to do with how the headers worked
(22:11:00) David Gucwa: oh
(22:11:02) TWinklevoss: from who?
(22:11:16) David Gucwa: I don't know, some person from thefacebook
(22:11:25) David Gucwa: I got a forwarded email about it
(22:11:29) David Gucwa: from cameron I think
(22:11:36) TWinklevoss: ok
(22:17:43) TWinklevoss: let me know when you have any progress on the aol emails
(22:19:30) David Gucwa: I don't really know much about this sort of thing. I'd say winston is more capable of handling this.
(22:19:35) TWinklevoss: ok
(22:19:39) David Gucwa: When does he get back?
(22:19:48) TWinklevoss: not sure
